Research Theme

Polymer and Natural Materials and Manufacturing (PNMM)

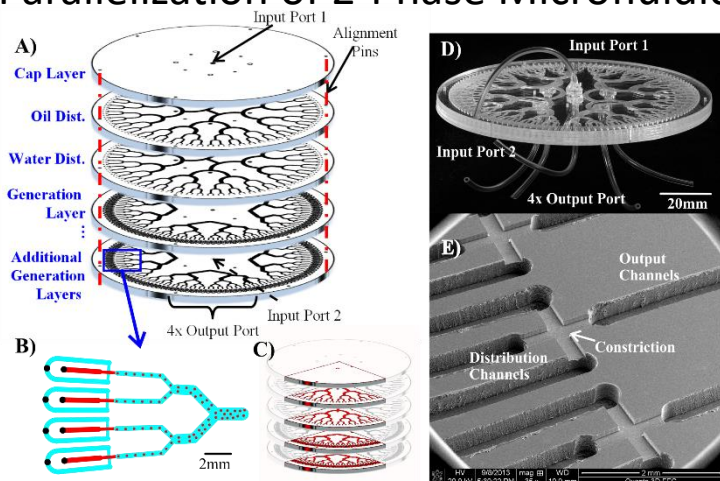

Research Areas

- Polymer Microfabrication
- Microsystems
- MEMS
- Microfluidics
- Parallelization
- Agglutination

Research Facilities/Tools

- AMNF – Cleanroom Facility
- Vacuum Embosser/Bonder
- Manual Injection Molder
- Microscopes
- Peristaltic Pumps

Parallelization of 2-Phase Microfluidics

Biomolecule Quantification via Agglutination
