## R&D Theme of Interest

Vision Guided Robotic and industrial automation

## Types of Products/Services

- Automation systems for industrial processing of materials including wood and composites.
- Inspection systems for online quality and process control.
- Integrated robotic systems.
- Integrated vision systems.
- Plant flow control optimization.
- Automation analysis for manufacturing facilities
- Rapid prototyping

## Infrastructure

- Small and medium scale integration facilities.
- Lab equipped with a variety of robots and vision systems for rapid proof of concept testing and system development.
- Bright and Nimble experienced Engineers.
- Extensive support network
