### Research Theme

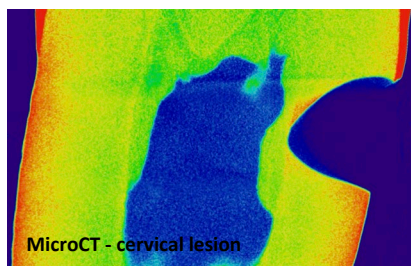

Biomedical and Biological Materials and Manufacturing (BBMM)

### Research Areas

- Dental adhesion and adhesives
- Development of novel antifouling resins
- Stability of dentin-resin interfaces
- Functional dental materials
- Resin composites biomodifications
- Photosensitive dental materials
- Dental resin cements
- Antimicrobial glass ionomer cements

### Research Facilities/Tools

- Instron Universal testing machine
- FTIR
- Ultra microhardness testing machine
- Vita Easy shade spectrophotometer
- Microtensile tester
- Microshear tester
- Isomet cutting machine
- Isomet polishing machine
- Anaerobic culture
